

SECURE ENDPOINT MANAGEMENT

The largest attack surface is your endpoints consisting of the systems, consoles, and laptops in use by you and your employees. From phishing emails, malicious websites, and internal threats, robust endpoint security is your first defense. There are so many decisions to make about what endpoint software, implementation, and ongoing management. Complexity has stalled businesses from moving beyond basic anti-virus, and they continue to miss out on the benefits of endpoint detection and response capabilities.

TECH LOCK provides full endpoint detection and response without disrupting business:

- Security protection of endpoints on and off your network.
- Replace traditional Antivirus and Anti-Malware.
- Block file-less malware and other advanced threat tactics through behavioral analytics.
- Quickly curtail malicious executions 24/7 with a swift and appropriate response.
- Identify all systems that encountered a like threat and initiate a comprehensive detect and respond plan that spans across other TECH LOCK services to remedy the trending threat.

Benefits with TECH LOCK:

-  Security protection across the most substantial asset base of your organization in addition to meeting compliance obligations to prevent malware and viruses
-  A way to utilize enterprise-grade endpoint security without the management overhead
-  Know the latest threats hitting your organization with their details to use in security awareness training and/or procedural changes to enhance overall security

WHY USE TECH LOCK?

TECH LOCK enables organizations to navigate, detect and respond to today's modern cybersecurity and compliance challenges. Through the orchestration of the industry's most comprehensive managed service, achieving sustainable and continuous security and compliance is now within reach. TECH LOCK's full spectrum security-centric approach delivers value to our clients through defined and measurable outcomes combined with independent cyber research, specialized skills and premium customer support and service.

MANAGED SECURITY AND COMPLIANCE SERVICE METHODOLOGY

The technologies that TECH LOCK provides are best-in-breed in security and detection capabilities. However, technologies on their own do not provide a cohesive solution. It takes people, process, and technology to ensure continuous security and compliance coverage. Our security engineers ensure an exact fit for your business needs.

Regardless of the mix of services with TECH LOCK, we use a standard method. From this process, we can provide continuous adaptive detection of security and compliance risk tailored for your business. TECH LOCK manages the orchestration across all our offered services. Our cohesive solution delivers better outcomes for our customers, whether they subscribe to one or all of our services.

ASSESS

We work with you to determine what's needed to hit compliance and security goals along with necessary resources and coverage.

IMPLEMENT

We provide the technology, deployment, and project management to get started quickly or manage changes when necessary.

ENGAGE

We continuously monitor, have regular meetings to understand any business updates so our security engineers can adjust accordingly to ensure up-to-date best practices.

ESCALATE

We provide threat detection validation and create an appropriate detailed response plan and the resources as needed.

RESPOND

We respond and advise during active remediation and validate that activities were effective in mitigating the security incident or risk issue.

REVIEW

We take proactive measures to keep current on threats, security trends, and continuously tune and develop to provide the best compliance and security services for your business.
