

Managed Security & Compliance Services for Healthcare

Since 2008, TECH LOCK, Inc. has provided hundreds of businesses with a portfolio of compliance and security solutions, coupled with proven experience, expertise and innovation. We know the healthcare industry is unique and has its own set of compliance and security issues to address.

Time-Critical Protection of Patient, Payment, and Healthcare Data

The following are some of the current difficulties facing the healthcare industry:

- The management of the variety of critical servers, desktops, and medical infrastructure.
- The fast-approaching end of life of support for server and desktop operating systems used across the industry.
- Inability to hire experienced security engineers with a background in IT healthcare systems.
- Cybercriminals never stop learning new ways to get to healthcare data, research, and payment data.
- Compliance focus instead of aiming for increasing security maturity puts organizations at risk.

TECH LOCK provides services that enhance security, compliance, and data threat protection.

You select the focus and we deliver the best technology and operational excellence. Personalized compliance and security support for your organization. Our team of experienced security engineers and consultants working to protect your business.

TECH LOCK CERTIFICATIONS

TECH LOCK, Inc. is a HITRUST CSF Assessor, Payment Card Industry Qualified Security Assessor (PCI QSA), and Approved Scanning Vendor (PCI ASV).

Managed Security & Compliance Services for Healthcare

Security Maturity with Long Lasting Results

TECH LOCK enables organizations to fill gaps and quickly elevate their security capabilities. Take advantage of best-of-breed technologies, expertise, and security operations personalized for your business. HITRUST research shows that mature organizations are less likely to suffer a breach and, should a breach occur, they can contain it quickly.

Solutions for Healthcare

- **Security management of firewalls** and network segmentation protecting at-risk medical devices and systems. Continuous monitoring for events and unauthorized changes.
- **Endpoint security** with behavioral analytics that protects. Coverage for systems that are shared, used to access payment gateways, and exposed to potential tampering in semi-public locations.
- **Compliance management** ensures that you never miss an obligation. Integrated compliance assessments make our services unique building efficiencies across security and compliance activities.
- **Third-party risk assessments** to evaluate the entities that are connected to your network and the web services integral to your business, exposing any critical cyber risk issues.
- **HITRUST CSF Certification** along with Certified PCI Assessors deliver compliance expertise and validation of the growing security maturity of the organization.
