Security Device Management

Security device management tends to become a set it and forget-about-it situation. The 'bad guys' automate perimeter threats 24/7 and find organizations that have misconfigurations or poor controls in place. Continuous monitoring and analyzing of alerts should not wait until business hours. For most businesses, this level of security coverage is not feasible.

TECH LOCK provides full management of the security devices protecting your organization:

• Review of configurations and traffic segmentation.

• Consolidate management across multiple locations or regions.

• Support for Firewall/UTM, Intrusion Detection, Remote Access Appliance, IDS/IPS, VPN.

• Devices are monitored 24/7 for heartbeat, unauthorized changes, and security events.

• Security Engineers provide analysis for real-time threat detection and response.

• Structured change management, review, and evaluation, to ensure best practices and compliance oversight.

BENEFITS WITH TECH LOCK

✓ Access and network controls are configured by security experts to make the most of the security device features for your environment

✓ Device updates and maintenance are managed and scheduled ensuring critical updates promptly with consideration to business needs and compliance adherence

✓ Events are leveraged within a cohesive detection and orchestration system along with your other services resulting in faster time to remediation for security incidents

WHY USE TECH LOCK?

TECH LOCK enables organizations to navigate, detect, and respond to today's modern cybersecurity and compliance challenges. Our focus is adaptive managed security services. Security operations, industry-leading technology, premium threat detection, enriched with independent cyber research. Cohesive security and compliance services delivering measurable outcomes and personalized support to our clients.

Managed Security and Compliance Service Methodology

The technologies that TECH LOCK provides are best-in-breed in security and detection capabilities. However, technologies alone do not provide a cohesive solution. It takes the combination of people, process, and technology to ensure continuous security and compliance coverage. Our security engineers ensure an exact fit for your business needs.

Regardless of the mix of services with TECH LOCK, we use a standardized method. From this process, we can provide continuous adaptive detection of security and compliance risk but tailored for your business. TECH LOCK manages the orchestration across all our offered services. Our cohesive solution delivers better outcomes for our customers, whether they subscribe to one or all of our services.

REVIEW
6

We take proactive measures to keep current on threats, security trends, and continuously tune and develop to provide the best security and compliance services for your business.

ASSESS
1

We work with you to determine what's needed to achieve security and compliance goals along with necessary resources and coverage.

RESPOND
5

We respond and advise during active remediation and validate that activities were effective in mitigating the security incident or risk issue.

IMPLEMENT
2

We provide the technology, deployment, and project management to get started quickly or manage changes when necessary.

CONTINUOUS ADAPTIVE SERVICES

ESCALATE
4

We provide threat detection validation and create an appropriate detailed response plan with the resources as needed.

ENGAGE
3

We continuously monitor, have regular meetings to understand any business updates so our security engineers can adjust accordingly to ensure up-to-date best practices.
