

Managed Security and Compliance Services

"TECH LOCK provides a way to navigate today's complex security and compliance issues"

Since 2008, TECH LOCK, Inc. has provided hundreds of businesses with a portfolio of security and compliance solutions, coupled with proven experience, expertise and innovation. We know that your business is unique and has its own set of compliance and security issues to address.

Security and Compliance is NOT a One Size Fits All

The following list are a few of the reasons security and compliance is difficult for small to mid-sized organizations:

- Limited IT and security focus creating a less than optimal starting point for building a security practice with integrated compliance requirements.
- Growing a business with new compliance obligations.
- Gaps in cyber risk knowledge with open security engineer positions that can't get resourced in a timely manner.
- Escalating security costs, especially managing security devices, and still experiencing a high amount false positive alerts.

TECH LOCK's mission is to provide the best options to exceed what you can do today allowing you to enhance the security, compliance, and protection of your business. You select the focus and we deliver the best technology, operational excellence, and care and support from our team of experienced security engineers.

Differentiators

Experience

TECH LOCK holds PCI QSA, ASV, and HITRUST CSF Assessor Certifications. TECH LOCK has worked with numerous financial institutions, retail, hospitality, restaurants, and healthcare providers since 2009.

Our staff has worked at these companies in operations, in IT, and in top Executive positions, so we know the business, the processes and we know the challenges.

People

TECH LOCK's compliance and security experts have advanced academic and professional credentials and backgrounds with leading businesses and trade associations, such as the Payment Card Industry Security Standards Council. Our team provides up-to-date research and strong leadership in the data security and privacy industry.

Innovation

TECH LOCK is an industry leader in information security technologies that capitalize on streamlined processes, enhanced performance and significant cost savings. Our integrated solutions conserve resources while providing a clear view of an organization's security posture and compliance status without causing undue burden on our clients' human and technical resources.

More Security with Less Effort

TECH LOCK provides Managed Security and Compliance with a SOAR approach. Our security service orchestrates among the technologies automating incident detection and then we respond with appropriate urgency. We scale the service managing all aspects and elevating the most important issues for your team to address all the way to providing first level response to critical incidents 24x7x365. The focus and outcomes you need can be delivered in a solution tailored to meet your immediate and long term goals.

Solutions for Integrated Security & Compliance

• **Managing firewall and perimeter security devices**

across multiple locations, ensuring configurations for only allowed traffic types. Continuous monitoring for events and unauthorized changes as well as log reviews.

• **Endpoint security** with behavioral analytics going beyond anti-virus. Protect systems that are shared, used by contingency or high-turnover workforce, and are critical to business.

• **Compliance management** ensures you never miss an obligation. From having proper policy and procedures in place to annual penetration testing, you can receive reminders or let us enable a fully managed compliance program unique for your business.

• **Third-party risk assessments** to evaluate the entities that are connected or have access to your network and also verify the web services integral business processing, exposing any critical cyber risk issues.

• **Certified PCI Assessors** will verify PCI DSS compliance and identify, with detailed recommendations, a roadmap to address any deficiencies or gaps.
